1. AREAS FOR PLANTATION

We were assigned place near Basket ball canteen and inside Bakul Nivas which falls under region '2' in the given college map.

Red :: Neem Plant

Green :: Palash Plant

2. TYPE OF PLANT CHOSEN

We decided to plant a plant locally called PALASH . Some of the members chose to plant some NEEM Plant .

3. PHOTO GALLERY

4. OBSERVATIONS

Soil was too much rocky . We ensured that there is sufficient spacing between adjacent plants . We observed that sufficient sunlight is available for each of the plant and we also ensured that my new plants are not overshadowed by other neighbouring plants. Regular supply of water and manure is required for proper growth of plant .

5. CHALLENGES

- *Collecting water was really a big problem as there was no water source nearby*
- *Soil was bit too rocky and we faced problems in digging the plants.*
